This walk begins that process. Alice will help you understand the dryland ecology here, and some of the recent issues with maintaining it. Denise will provide her knowledge on the birds, lizards, insects and plants. The walk will involve some car shuffling and carpooling to avoid having to walk there and back. Be prepared for a fascinating day. Note that this will be a moderate to hard walk because of the soft ground, distance, and exposure to wind and sun.

We examine the features of the pā sites (defences), kāinga (village), and gardens that are still recognisable in the landscape, and how the natural setting, biodiversity and resources led to the occupation and development of these sites. We will further discuss how our geology, ecology, archaeology and cultural history are interwoven in the 'Te Pātaka o Rākaihautū / Banks Peninsula Geopark'.
